

Frontrunner SB

Solid backed 'scrape and clean' entrance flooring system

- Open ribbed, solid back construction
- Hollow construction for lighter weight
- Heel and wheel proof
- Roll format ensures minimum of seams and speed of installation
- Easy to shape and install on site
- REACH compliant PVC

New to the Frontrunner Entrance Flooring System range is a solid backed entrance flooring system. Frontrunner SB's open ribbed top surface removes underfoot dirt so as not to be subsequently carried in, reducing cleaning and maintenance costs. Its flexible PVC composition allows for easy cutting on site to fit any shape. Frontrunner SB's hollow ribbed construction makes it light to handle during installation yet sturdy enough to be heel and wheel proof. Additionally, the 6mm overall height eliminates the requirement for a recessed matwell. The ribbed top surface and solid backing combination allows for the containment of debris out of the traffic area. The solid backing facilitates bonding to subfloors.

Roll sizes:
10m x 1m
20m x 1m

Colour:
Black grid

Frontrunner SB+

Solid backed 'scrape, clean and dry' entrance flooring system

- Open ribbed, solid back construction
- Hollow construction for lighter weight
- Specially formulated absorbent inserts
- Heel and wheel proof
- Roll format ensures minimum of seams and speed of installation
- REACH compliant PVC

New to the Frontrunner Entrance Flooring System range, is a solid backed entrance flooring system. With the same characteristics as Frontrunner SB (see reverse of page), Frontrunner SB+ has added absorbent inserts with monofilament scrapers that remove moisture at the entrance, providing clean and dry all in one movement. The ribbed top surface and solid backing combination allows for the containment of debris out of the traffic area. The solid backing facilitates bonding to subfloors.

Roll sizes:
10m x 1m
20m x 1m

Colour:
Black grid with
Excellence 607 insert
