

Plastex Chex

100% recycled heavy duty checker plate PVC tiles

- Checker plate surface with interlocking jigsaw design
- Made from 100% REACH compliant recycled PVC
- Slip resistant, hard wearing on checker plate surface
- Insulating properties
- Chemical, oil and acid resistant
- Made in the UK

Plastex Chex is a hard wearing tiling system made from 100% REACH compliant recycled PVC, delivering long life and value for money.

It can be used as a temporary or permanent flooring solution for coverage of large areas in the workplace, such as work stations, finishing/assembly areas, laboratories, localised workcells and machine shops.

The checker plate surface guarantees slip resistance for improved safety at work, whilst the PVC construction absorbs shock and noise as well as being resistant to chemicals and extreme temperatures.

Tile size:
500mm x 500mm x 14mm

Colour:
Black

Packaging:
16 tiles per box
(4m² per box)
